01

Digital documentation and drug information in one place

Unlike any other application available in this space CliniRex provides a unique opportunity to perform Drug information searching and Clinical documentation at one place. CliniRex provides institution specific activity documentation forms and evidence based clinical information in one place.

02

Patient specific drug Information

CliniRex using our strength in AI & ML (Artificial Intelligence and Machine Learning) helps in provision of drug information which is required in specific to the patient which the student is following. These alerts help the students to understand the patient better and provide quality clinical care suggestions.

03

Offline documentation and drug information

Now CliniRex offers its users not only to access the drug information without the internet but also documentation of clinical activities without the need of internet at anyplace and anytime with our innovative mobile applications.

04

Indianised brand name database

CliniRex provides information on many of the brands which are available in the indian market with the composition, manufacturer and updated pricing details. Students can now search for Indian brands and generic details.

05

Monitor and track student activity like never before

CliniRex offers a unique opportunity to monitor students performance based on many criteria like the quality of activities being documented, Rotation assessment, punctuality, end of rotation examination and many more. You will always have a track on the student performance by our automated daily, weekly and monthly reports.

06

Millions of freely available full length research articles at one place

CliniRex offers a repository of millions of full length free research articles in the most organised way to filter between clinical trial publications to guidelines to systematic reviews. All the articles shown are full length which can be easily downloadable and printable.

07

Thesis and research support

CliniRex offers extensive support in the areas of research from designing of data collection form to data analytics. CliniRex can easily generate hypotheses on the study after a successful completion of statistical analysis assessment.

08

Rotation management and online exams

One of the most complex things of posting the students in hospital units according to their preferences and thesis requirements and assessing the student before, during and after the rotation is simplified with just a few clicks with CliniRex

09

Facilitation of retrospective analysis of available data

As a huge amount of data is being entered by each and every student on a daily basis, colleges will be rich with structured data and CliniRex helps in mining the data so easily with statistical values and desired visualizations. Automated activity reports and digital logbook.

10

Automated activity reports and digital logbook

CliniRex automatically sends insights on the student performance every day, week and month to stay updated on what is happening and which student is performing how. As every activity is documented online logbook of every student will be automatically generated based on weekly or monthly preferences.
